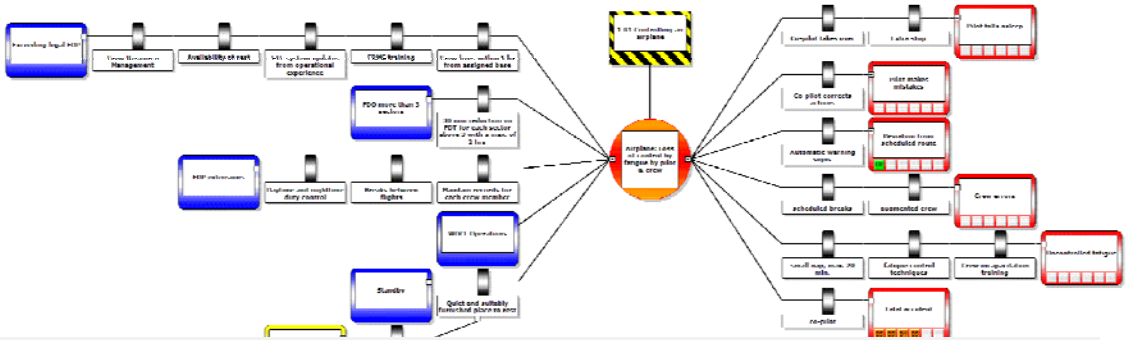
Continuous Safety™

Training

Practical SMS Auditor/Assessment &
Bow Tie Risk Management Training
(*also available in-house*)



Would you like to have a better understanding about the difference between safety & quality?
Would you like to effectively make proper use of the Bow Tie Risk Management methodology?

Rationale:

Safety does not cost, bad safety management does. Incidents and accidents still happening to certified organizations. The courses are combined to satisfy and exceed the ICAO SMS "pillars" requirements of Safety Risk Management and Safety Assurance.

Get home:

The skill & tools to effectively make Risk Management and audit, inspections, surveys as part of Safety Assurance activities, making use of real world best practice examples and exercises to accomplish:
-Effective Hazard Identification
-Effective Safety Compliance Auditing
-Effective Qualitative Bow Tie Risk Assessment
-Assessment of Safety Control Barriers effectiveness
-Escalation Control Factors Effectiveness
-Root cause analysis, incident Investigation review and communication
-Effective Overall Organizational SMS Assessment

Who can profitably benefit from it:

CEO's, Inspectors from NAA's, Accountable Managers, Post Holders, Maintenance Managers, Quality and Safety Managers, Compliance Managers, TR-TO Head of Training, avSec Managers. Staff from Airport Operators, Handlers, FBOs, Airplanes and Helicopter operators are welcome.
